

MCB OVERSEAS FUND

KEY INVESTOR INFORMATION DOCUMENT

This document contains key investor information about the MCB Overseas Fund (the “**Sub-Fund**”) and its current class of units in issue, namely the “**Retail Accumulation Class**”. It is provided with informational purposes only and does not constitute marketing material. The information is intended to help you understand the nature and the risks of investing in this Sub-Fund. You are advised to read this document carefully to make an informed decision about whether to invest.

MCB OVERSEAS FUND

The Sub-Fund is a MUR denominated sub-fund of MCB Unit Trust (the “Fund”) with ISIN: MU0650S00079; Citi Code: K2JZ; Bloomberg Code: MCBOF00 MP. The Fund, together with the Sub-Fund, are managed by MCB Investment Management Co. Ltd (the “Fund Manager”), holder of a CIS Manager licence issued by the Financial Services Commission. The Sub-Fund consists currently of one class of units, i.e. the Retail Accumulation Class.

Objectives and Investment Policy

- ❖ The Sub-Fund adopts an active management approach within a medium-to-high risk strategy with the primary objective of achieving long-term capital appreciation through investment schemes providing exposure to the world’s principal stock, bond and currency markets.
- ❖ The investment objective of the Sub-Fund makes it suitable for investors who are seeking to invest in a diversified portfolio of overseas stock and fixed income securities for the long term. The Sub-Fund may also be considered by investors willing to regularly set aside income for their children planning to study abroad in the coming years.
- ❖ Units can be bought and sold once a week on every Friday. Proceeds of repurchases/redemptions are usually paid to unit holders, subject to the terms of the Fund’s documentation, within 10 business days after the processing date.
- ❖ Given that the Sub-Fund will invest in securities which usually reinvest all income, the Sub-Fund is not likely to allow a regular distribution of a meaningful dividend. However, the Manager and the Trustee may, from time to time, decide to distribute any surplus income.
- ❖ The Sub-Fund is actively managed, with the Fund Manager applying fundamental analysis in order to pick securities in a selective and discretionary manner.
- ❖ The units are denominated in MUR, the Sub-Fund's base currency.
- ❖ The Sub-Fund’s returns depend on the performance of its underlying investments and it does not provide protection against investment losses caused by financial markets.
- ❖ Suitable for investors, with any level of investment knowledge, seeking capital growth. The product does not offer any capital guarantee. Investors must be able to bear loss of capital in order to seek to generate higher potential returns and should be prepared to remain invested for at least 3 years.

Risk and Reward Profile

The risk category 6 reflects a potentially medium gain and/or loss in the value of the portfolio. This is due to diversified investments in overseas equities as well as fixed income securities.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund. The actual risk profile can vary significantly if you sell at an early stage and you may receive a lower amount than your initial investment.

The risk category associated with this Sub-Fund can evolve over time based on market conditions. The lowest risk category does not mean "risk free".

Your investment is not guaranteed. The summary risk indicator is a guide to the level of risk of this product. It shows how likely it is that the product may lose money because of movements in the markets.

Significant risk(s) for the Sub-Fund include, but is not limited to:

- ❖ **Market risk:** the performance of the Sub-Fund will be dependent on the performance of the overseas stock, bond and currency markets and the value of the Sub-Fund will fluctuate as a result of changes in their market prices.
- ❖ **Foreign currency risk:** The Sub-Fund has assets denominated in currencies other than MUR and is therefore exposed to the risk that the exchange rate of the MUR relative to these currencies may change in a manner which has a material effect on the reported values of the Sub-Fund's assets which are denominated in foreign currencies.
